In his groundbreaking book, *Bullet Proof* Robert Schoch, world-renowned geologist Dr. Robert Schoch challenges the traditional timeline of human civilization. Schoch presents compelling evidence that the Great Sphinx of Giza and other ancient Egyptian monuments are far older than previously thought.

Schoch's research has led him to conclude that the Sphinx was built around 10,500 BC, which is over 5,000 years earlier than the commonly accepted date. He also believes that the pyramids were built around 12,500 BC, which is over 2,000 years earlier than the traditional date.

Schoch's findings have sent shockwaves through the archaeological world. If he is correct, it means that our understanding of ancient Egypt and human civilization must be rewritten.

In *Bullet Proof* Robert Schoch, Schoch presents a wealth of evidence to support his claims. He examines the geological evidence, the archaeological evidence, and the astronomical evidence. He also provides a detailed explanation of his controversial Sphinx water erosion theory.

Bullet Proof Robert Schoch is a must-read for anyone who is interested in ancient Egypt, human civilization, or the mysteries of the past. Schoch's findings are sure to challenge your beliefs and open your mind to new possibilities.
