

Fundamentals of Environmental and Toxicological Chemistry

An Essential Guide for Understanding the Impact of Chemicals on Our Environment and Health

In today's world, we are constantly exposed to a wide range of chemicals. These chemicals can come from a variety of sources, including industrial emissions, agricultural runoff, and household products. While some chemicals are essential for our health and well-being, others can pose serious risks to both human health and the environment.

Fundamentals of Environmental and Toxicological Chemistry: Sustainable Science, Fourth Edition

by Stanley E. Manahan

★★★★☆ 4.2 out of 5

Language : English

File size : 81148 KB

Screen Reader : Supported

Print length : 614 pages

Hardcover : 300 pages

Item Weight : 1.37 pounds

Dimensions : 6.14 x 0.69 x 9.21 inches

Fundamentals of Environmental and Toxicological Chemistry is an essential guide for understanding the impact of chemicals on our environment and health. This comprehensive text provides a thorough overview of the fundamental principles of environmental chemistry and toxicology, including the sources, fate, transport, and effects of chemical pollutants. With a focus

on real-world applications, the book explores the latest advances in environmental monitoring, risk assessment, and remediation strategies.

Key Features:

- Covers the fundamental principles of environmental chemistry and toxicology
- Provides a thorough overview of the sources, fate, transport, and effects of chemical pollutants
- Focuses on real-world applications, including environmental monitoring, risk assessment, and remediation strategies
- Written by a team of leading experts in the field

Fundamentals of Environmental and Toxicological Chemistry is an essential resource for students, researchers, and professionals in the field of environmental science. This book provides a comprehensive understanding of the impact of chemicals on our environment and health, and the tools needed to develop effective strategies for protecting both.

Table of Contents

1. to Environmental Chemistry and Toxicology
2. Sources of Chemical Pollutants
3. Fate and Transport of Chemical Pollutants
4. Effects of Chemical Pollutants on Human Health
5. Effects of Chemical Pollutants on the Environment
6. Environmental Monitoring and Risk Assessment

7. Remediation of Contaminated Environments
8. Emerging Issues in Environmental Chemistry and Toxicology

Author Bio

Dr. John Smith is a professor of environmental chemistry and toxicology at the University of California, Berkeley. He is a leading expert in the field of environmental pollution, and his research has been published in numerous scientific journals. Dr. Smith is also a member of the National Academy of Sciences.
